Angels WARN; Brace For The Chaos That Must Come First! How To Enter 5D Within 2032-Diana Cooper

https://www.youtube.com/watch?v=HeUUzg6HuYk 58m 12-18-2025 Jannecke Øinæs

In this episode we meet the legendary spiritual teacher and bestselling author Diana Cooper, known as The Angel Lady. She shares her extraordinary life story — from a near-death experience that changed everything, to her encounters with angels, unicorns, and the elemental realms. Diana reveals the true meaning of ascension, the purpose of Earth's transformation into a 5D planet, and why the year 2032 marks a turning point in humanity's evolution. You'll learn about Atlantis, the Golden Age, the Intergalactic Council, and how to connect with higher frequencies to co-create a new reality. Diana also speaks about self-love, animals as spiritual beings, and the power of focusing on the positive to manifest miracles. Please enjoy the episode with Diana Cooper. Find all links to Diana Cooper here https://wisdomfromnorth.com/diana-cooper-2.

27:11 Why chaos precedes the Golden Age
29:32 What life will be like in the Golden Future
39:02 The Intergalactic Council explained
55:11 Self-love and the deeper meaning of life

DIANA: The minute you think about an angel, an angel is with you. I've worked with the angels ever since and then, of course, the unicorns appeared, after that the dragons and I'd been working with the elemental kingdom. My life has totally transformed.
JAN: You had a near death experience.
DIANA: So I had cancer and I was at the point of death. It was a much deeper review. They took me through absolutely everything and said, 'Do you want to stay or go?' And I said, I don't mind whatever's for the highest good. But in order to do my new mission, I had to clear out a lot more stuff. So I had cancer again. And this mission was to take 5 million people into higher ascension. This is really, really exciting. Our planet was designated to be a fifth dimensional planet after 2032. And why it's so important to incarnate at this time, a unique opportunity throughout all the universes, it's so important that we're here.
JAN: Diana Cooper, a warm welcome back to the Wisdom from North show.
DIANA: Hello and thank you for inviting me again.
JAN: It's so lovely to see you. I remember I interviewed you way back when in 2013, in the beginning of my YouTube career. And it was just so interesting what you said in that episode because it was pointing to year 2032, which so many astrologers on my show are speaking about right now, that that's the era where we will start moving into this Golden Era or Golden Age or people call it different things. And I thought you were just so spot on pointing to this so

many years ago. And that's what I would love to dive into today. But before we do, let me introduce you because you are called the Angel Lady. You have written over amazingly 30 books. You have been working with the angelic realm ever since you had an encounter with an angel and also with unicorns, ascended masters and you are an international speaker and still working so much and I'm just so impressed. Lovely to have you back.

DIANA: Thank you.

JAN: I would love to hear about your story for everyone who's new to you because it's quite inspirational coming from a life crisis all of a sudden having an angel appearing and all of a sudden having these powerful missions that you have in this incarnation.

DIANA: Yes. It's been a fascinating life I have to say. And so I was born in the Himalayas, which is particularly interesting because in September this year at the full moon, which is a lunar eclipse, it's my 85th birthday and I will be in the Himalayas.

And so that is so exciting. And then I'm going to give a lecture in Delhi right after about the golden future and bringing in the energies for India for the golden future, which is actually for the whole world. So to me, this is a really fascinating time.

But my background was that I came from a third dimensional, very conventional, no religion, no spirituality, no psychic stuff background. And then I was getting divorced, I was 42, which is a turning point for people anyway. And so because most people don't know that they have an over lighting archangel and every seven years, your over lighting archangel consults with your guardian angel to see if you need anything.

And every 21 years, then there's an especially big consultation to see if you need to move your pathway or if you need anything extra. And who I was 42, which is the next big one. And I was in rock bottom getting divorced. I could only see darkness ahead. I was such a wimp in those days. I had no idea of anything. I didn't believe I could earn a living, didn't know what to do.

And I sat in the chair and said, well, if there's anything out there, show me. And you've got one hour. And her angel came in. It was a golden angel, even though I knew nothing about angels. I knew this

was an angel. And it just held out her hand and took me on a journey.
And we went to lots of places. But the one I remember most is we flew over this hall full of people. They all had rainbow auras and I looked down as I flew with my guardian angel and said, am I down there in the audience? And the angel said, no, I'm pointed to the platform and said you're to be a spiritual teacher.
Oh, we came back exactly an hour later. And I had no idea what to do with the information. I didn't even know what a spiritual teacher was. I wrote it down and then I waited and I started to meet people and I trained to be a hypnotherapist.
So then, of course, I met a lot more people in that type of field. And I trained, set up in practice and I was aware of angels around my clients. But I didn't communicate with them or connect with them. But ten years after the first visit, I was lying in the bath and I was just asking for some guidance for the evening classes I ran and the angels were back.
And they said, we want you to tell people about angels. And I said, no way. This was a long time ago, remember, over 40 years ago, people will think I am crazy. So 30 years ago. So I said, no, I don't want to do that. Thank you. Give me something else. And they said the words that I'll never, ever forget.
Who is doing your work? Is it your ego or your higher self? And I said, okay, point taken, got out of the bath, put a towel around me. And I sat on the bed and these three angels stood in front of me and gave me loads of information for what became my first angel book. It was my fifth book by that time. But that became what is now *A new light on angels*. But the story didn't end there because as soon as it was published, I was invited onto morning television and fascinating. I went into the studio all nervous because it was my first time on telly. And I said to my guardian angel, please will you step into the photo because they asked if they could have this tape, my aura photo taken. So my guardian angel agreed. And I just thought people would sense the light.
And it impressed itself onto the photograph. I mean, what bigger support could you have than that? And the phone lines went into

meltdown. They had a bigger response than they'd ever had for anything. And so I was invited back next day. And then I had to, and this is the exciting thing. A whole lot of the calls came from people who had had an angel experience but never dared talk about it. So I kind of opened the doors. I've worked with the angels ever since. And then, of course, the unicorns appeared. And after that, the dragons, and I'd been working with the elemental kingdom, my life totally transformed.

JAN: Wow. Yes, I can't imagine that it transformed completely. For everybody who's curious as me, when you say an angel appeared in the room and there were three angels in front of me, how physical are they? Do they feel physical? Do they see them? Do you see them physical or do you just sense them more?

DIANA: It's different every time. Sometimes I feel them, sometimes I sense them, sometimes I see them. But it's always ethereal. And it's more of a knowing than a seeing. One of the first times I went on the radio and I was in Ireland. And to my horror, the interviewer started by saying, “And so what do you English think you can teach us about an angel” or something like this?

Well, my granny was Irish. So that changed the energy rather. Oh, you're one of us, he says, and becomes all matey. But then at the end, my horror, he says, I'm so, what's my guardian angel look like? And I thought, oh, I'm going to have to say, I can't see it. And then I knew, I knew what color it was, I knew where it was standing, I knew what it was saying to him. And I can't say that I saw with my physical eyes. But here's the interesting thing. I went with the promoter of the workshop that I was going to do. And she was behind a glass screen and she was a clairvoyant.

So she had always seen angels and she stood up and she looked through the screen. And as I was describing it, she said, you saw, you described exactly what I was seeing. So I always say to people, you do not have to physically see. It's enough just to know that in fact knowing is a higher frequency than clairvoyants and dispel all myths about you have to see.

And here's the other thing. The minute you think about an angel, an angel is with you. It was very interesting when we were translating

orbs which is the angel energy, which is in, impresses itself into photographs. And there's so many of them around. And we were right at the beginning, we were being taught about orbs by my guys. And somebody then said, oh, ha, I made that orb up. It wasn't a guard, my angel. It wasn't an angel that you said. And we said to my guide, Kimiko, how come? We could feel the angel energy in it. We knew it was an angel orb. And he said, huh, but the moment he started to fabricate an orb, he was thinking about angels. As soon as he thought about the angels, it actually came into it. And so it was an angel orb, even though he thought he was trying to fool us.

JAN: Well, that's a lovely thought that every time we think about it and an angel they appear. And then after our interview, many years later, you had a mission that ended in 2016, where you, your mission was to impact, I think, with 7 million people or something, make them aware of angels. Yes. And then you had a near-death experience. And I was not aware of that. Do you mind sharing a bit about that? And that you sort of prolonged your time here on Earth with a new mission?

DIANA: It's been totally fascinating again. So I had cancer and I was at the point of death. I had three operations in a month because they gave me a... I had a colleague. I had part of my colon removed and then it broke down. All the seams broke down. And so they then had to give me a stoma. So that was two operations. That didn't work. And so I then had to have a third operation very quickly to put it back. And I was seen as... I wasn't able to eat or anything anyway. I got to the point where I was dying. Family was called in. Two of my children had arrived. The third one was on the way.

My major organs were all closing down. I had, again, it was a voice and it took me through a life review. And at the end of the life review, it said, do you want to stay or go? And I said, well, will my grandchildren be all right and will my dogs be all right? And they said, yes. So I said, well, I don't mind. It doesn't matter to me. I'll stay or go whatever is for the highest good. And then again, the next night, the same thing happened. And it was a much deeper review. They took me through absolutely everything and said, do you want to stay or go? And I said, I don't mind whatever is for the highest good.

What I didn't know was that at that moment, a whole change took place. I was given a new list of life, a new mission, and allowed to stay on because I was supposed to go. That was the end of my designated life.
And then I was given a new mission. And Merlin came in. This was actually a few years later. Oh, yes. And I have to tell you that it was a few years later. But in order to do my new mission, I had to clear out a lot more stuff. So I had cancer again. And so, but this time, it wasn't, I got it very quickly, thanks to my dog. Who came and sniffed me in exactly the same way as she'd done the first time. And also, I had the same symptoms. And so, I was able to go to the doctor and say, look, I've got cancer again. He said, no, you haven't. Fine. Let me feel your stomach. And I said, I got it. He said, no, you haven't. But I'll take a blood test just to pass it by you. I was actually in hospital that night. Anyway, I know that quick. It was amazing. I had so many experiences during all of this.
And during that second experience, it was awesome. From the moment I knew, my inner sun was shining. I was in a seventh dimensional space. It didn't matter what happened. I felt totally relaxed and happy about it. And people said, well, you're getting in for an operation tomorrow, but you're glowing. So, yes, this is the angel energy inside me, making my inner sun shine. That was really amazing.
Anyway, a while later, and when I'd recovered, I was just in my kitchen, sitting in a dark winter's night by my wood burning stove, and Merlin comes in his electric blue cloak with platinum silver stars. And he says, basically, I've got a mission for you. I want you to start an angel school, a magic school. And I said, magic? I don't know. I think about magic. And he said, I'm very skeptical, as you can tell. And he said, no, my magic is of the higher heart. It comes through the higher heart.
And to start, I want you to start working with that. And he'd give me a whole lot of instructions. And he's been with me ever since. But then I was given a new mission. And this mission was to take 5 million people into higher ascension. Now, this is really, really exciting. Our planet was designated to be a fifth-dimensional planet after 2032.

When every planet has moved up, every star, every universe has moved up a dimension, except for Earth, which has had to move up two dimensions. And so I then had to start working on higher ascension, which has meant amazing things. It's meant merging with six of the archangels. It's meant connecting people into the wisdom of the stars, bringing through light codes from the stars. It's helping people to build their crystalline light bodies, their crystalline brains and hearts for the golden future that lies ahead.

But Earth has moved so fast, so much beyond anything that the spiritual hierarchy ever contemplated that the Intergalactic Council has had to have a special meeting to discuss what's going on Earth and seeing what extra support we need to help us move into these higher realms. So it's beyond extraordinary. And the greatest way we can help is to focus on the positive, focus on the golden future that is coming and bringing it about more quickly by only focusing on the positive and giving no energy whatsoever to the new, to all the stuff that's out there. Don't give that any energy. Don't make it bigger. Just focus on the awesome stuff that lies ahead.

JAN: Wow, what a fascinating journey you've had and still how.

DIANA: What miracle is going to happen today?

JAN: Yes. And what beautiful state to be in in that question, like what miracle might happen today. So this 2032, it seemed like you got a strong message about that early on. And it seems very specific. Will there be an event or is it more a dimensional split or? Yes, what will actually happen?

DIANA: Probably nothing because 2012, everybody was talking about 2012. Well, some people were saying it was the end of the world, but light workers all knew it was the end of a 260,000 year cosmic era. I mean, this life is that important. So 260,000 years was the era of Atlantis. Now, the last experiment of Atlantis fell 10,000 years ago, and it's taken 10,000 years to tireball the loose ends, learn the lessons, bring right energies forward. And that ended on the 21st of December, 2012. And at that moment, at the cosmic moment, at 11:11 on that date, source energy touched the heart, just for a fraction of a second, of every single being, not just on this planet, not just in this universe, but throughout all the universes.

So everything then started a movement upwards into a higher dimension. Angels moved up, all the old spiritual levels that we thought were there. They're all changing because everything is going up. Many animals went straight up into the fifth dimension. Elementals started to move up. Everything started to rise in frequency. Now, the difference was, and the reason why Earth is so important, and why it's so important to incarnate at this time, a unique opportunity throughout all the universes, it's so important that we're here, was that Earth was third dimensional in a fourth dimensional planet.

And, of course, the dimensional universe, so we had to move up two dimensions. Everybody else had to move up one dimension. But the reason we had to move up, that we'd fallen down so far, was because when the clarion call went out for a planet to take on the experiment of free will, everyone said no way. And there was only one place brave enough to take on that experiment, and that was Earth. And so beings from all over the universes have come to Earth to participate in this experiment of free will. No one ever expected that we would sink down so low.

That was never considered that it would be a result of the experiment. However, we did. We became third dimensional. And this is the reason why, because only courageous souls come here. And this is why people say, if they meet you out in the universe, you've been to Earth. Wow, you're brave, because it's so difficult when we've got free will. And so Earth is receiving so much assistance now.

Everybody on Earth is getting help. But because it's end times, we have to clear all the karma that was there. So in previous times, if you had, if there was some karma in your family, you had a choice whether that person died, your great-great-grandfather died, leaving a load of karma. You had a choice whether you took it on or not. End times, everybody had to take it on. And so there was no escaping, and there was a great massive stuff that had to be worked through. But that is now finished. They have closed the karmic gates. And so the new children are coming in with lessons, but not with karma. So it's very interesting how this is playing out, as they are coming in with

very different, calibrated in a totally different way already for the golden future. So many of the new babies coming in, they've got their 12 strands of DNA already, already with all their latent gifts and talents. And the only thing that stops it from all coming out and them having powers beyond anything we can imagine is the frequency around them.
So if you have a child, a baby, the greatest gift you can give them is to keep the frequency high. Keep the place calm, centered, bring forward their gifts and talents. And then the gifts that everybody will have in the golden future will start to come forward. But remember this, golden Atlantis was a 1500 year time during that 260,000 years. It's the time people remember the good time when the people had powers and gifts and talents beyond anything we can imagine.
Now that is all going to return to us, but at a higher frequency, because instead of being fifth dimensional people on the third dimensional planet, we will be fifth dimensional people or above supported by a fifth dimensional planet. Does that make sense to you?
JAN: Yes, I mean, it does. And I've heard parts of it before also. And I get curious about Atlantis. Was it a concrete place or was it more in another dimension that it existed?
DIANA: It existed and existed for most of the 260,000 years. But it was an experiment, like everything on Earth is an experiment, we're an experimental plane. And so the first time it filled the Atlantic Ocean, but the people became dark, they became very low. So the experiment was terminated. And the same thing happened with the second, third and fourth. In those early experiments, they gave the people everything. I mean, I took all about it in Discover Atlantis, which came out 20 years ago, but they took all about it.
And they, the people, they came in from everywhere, but they couldn't maintain the frequency because they were given everything. It's a bit like teenagers. If you give them a call and it's got everything they could possibly want in it, it's not theirs. They haven't made it. They don't feel a connection to it. And so if you build it yourself, if you do everything else, you feel that that's yours. And so for the last

experiment, which resulted in the Golden Era, they gave them nothing. They just had to learn to communicate.
They had to learn what the plants did. High priestess, priestess came in and taught them about the plants, but they had to provide shelter for themselves. They did everything. They had to learn everything for themselves. So it was a very interesting time that out of that, out of the cooperation that they had to have together, they created the Golden Era.
JAN: Why did it descend then? Okay, people always ask that.
DIANA: The answer is that one major highly evolved priest in the priesthood decided that he could use the power for himself instead of for the collective good. The second he thought that a dark angel came in and that spread and it very soon devolved very quickly.
JAN: Interesting. I want to move back to sort of the times we're finding ourselves in. Why do we see so much struggle, chaos, darkness and polarity right now when in one sense we're speaking about, we're getting closer to a Golden Era where everything will change and then we look at the news and it's...
DIANA: It's easier to explain to us this. Have you ever had a new kitchen put into your house? Well, if you haven't, you can just imagine it. Okay, but you're not just having a new kitchen. You're having an extension with a brand new kitchen and all the old kitchen has to be destroyed. It has to be taken out, carted away. There's dust. Things you haven't seen for ages come out of the woodwork because the old has got to be cleared out so that then the new kitchen can come in. But we're not just having a new kitchen in. We're having a big expanded kitchen put in so that's even more and we are still in that chaos stage. It will soon change. We're starting now to prepare for the new kitchen coming in. We're starting to order the new units, the new lights, the new cookers. It's all starting as people start to focus on what is going to be there for us in the golden future
JAN: Do you think that all humans will move into this new future or will there be resistance and some will choose not to do it, to continue the power games?

DIANA: If anybody remains in the third dimension, then they won't be aligned with the energy of the golden future. So they won't want to be here.

JAN: How would you describe if you have any maybe premonitions about it or knowledge about it that you've received? How will it look like this Golden Age? What will humans become?

DIANA: There we are. Another look that will tell you is that it is about the golden future that we are about to create on this planet when the energy is going to be fifth dimensional and now even higher as we're moving into higher ascension, where it's going to be a time of cooperation. It's the consciousness that's going to be different. So we're not going to have huge hospitals, huge schools all built to satisfy the ego of politicians. We're going to have small units that are right for the children, right for anybody that's sick.

But, of course, because we're at a higher frequency, we're not going to have to pass through all these illnesses through our bodies, which we've been doing as we've taken on the energies of the past, so much of the sickness now is people taking in the energy and passing it through and transmuting it. We won't be doing that anymore. If you are ill for any reason, you go to a healing center where you're realigned, where you're retuned and so that you don't have to do any of that old stuff. We will also have rejuvenation chambers, regeneration chambers.

It'll be on a totally different scale. People will be much more social, much more family orientated. What happens is that as your Earth star chakra becomes fully its dimension anyway, but as it raises its frequency and you learn all the lessons of the Earth star chakra, you find yourself in the right place for you. You find that you've attracted soul energies. So people will be living with soul families and surrounded in soul mates, people on the same wavelength as they are, and they will be telepathic.

They will be heart-centered, so that you communicate without any of the disruption that happens nowadays as we talk. You'll be connecting heart to heart, and so people will be contented.

They'll be happy, because of all the technological progress, people won't have to go out to work. They will have that time for leisure, for

sport, for looking after themselves, for doing fun things with their communities, and they will be working together for the highest good, so decision-making processes will be different. You have a family or a community. What you do is you all meet together, you state what the choices are, what the situation is. Everybody tunes in and asks to make a decision for the highest good.

As soon as that is done, the decision is easily made. Everybody is satisfied because they know it's for the highest good. Currently everybody is bringing ego into it, but if it's only for the highest good, why would anybody want anything else? And so people will be working always for the highest good. Because people are confident in themselves, because, of course, they're living in totally loving communities, everything is open and above board, there is no secrecy.

You can see somebody's aura, so you know if they're telling the truth, so everybody's going to tell the truth, because it's obvious if they're not. So you know that you're safe. There's a total feeling of safety and love and being held because everything is transparent. And because you feel loved and confident in yourself, you are welcoming and loving to other people.

So if you want to go out into the park and there's a group of people and they're painting and another group of people playing a game, another group of people playing musical instruments, you feel perfectly happy to go and join them. In the current paradigm, you think people tend to think I don't know those people, or maybe I'm not good enough, maybe they wouldn't want me. All of that is old energy. In the golden future, what we'll be doing is saying, I think I'd like to join in, and the people immediately pick that up and they invite you in.

So everywhere you go, you're welcome, and you're feeling happy and contented with what's going on. Children in schools, it will be so different because instead of lumping all the children together, putting them into a classroom where they have to sit for a long time and expecting them to listen, every child will have an individual program suited to their gifts and talents.

How different is that? And because of the advanced technology, that will be easily done and teachers will be highly respected and so teachers will be motivated too. And so every child in their small school where they are honored and respected will be doing their best because they're doing what makes them happy and fulfilled. We're not going to be pushing a child to be a solicitor or an accountant or whatever because we will be looking at the child's gift and talents and bringing that forward.

So everybody will be fulfilling their potential and feeling good about it. But the new consciousness and technology works in other ways too on a practical level. At the moment, if you need to go somewhere, you either have to go into the garage and get out your car or call it taxi. You send out a thought and our thought power is powerful now. It'll be even more powerful than because your thought goes out, I want to visit somebody, you go to the front door and the communal vehicle is waiting for you to take you there. I know it sounds in our current consciousness, it sounds like a fairy tale.

But as we see how rapidly understandings and technology are changing, this will be normal and commonplace. And that will happen in our lifetime. It depends how long you're going to live. By 2050, for example, the world will be changed beyond recognition. I mean, already in America and other places, there are people driving in driverless cars. Lots of people still think that's fairy tale. But, of course, we'll all be doing that before very long, definitely in our lifetimes.

JAN: And where is our responsibility in this and how much are we responsible to make this happen? Or will it more just happen for us because of the external help we are receiving and the energies that are coming in?

DIANA: Every single thought each one of us puts out there is creative. We each create our own universe. But collectively, we are creating this, which is why I say that the more people that focus on the positive, that focus on the good that's happening, focus on what they do want, the golden future they want, then the more quickly it will happen and more easily it will happen.

And so we can hold it back by focusing on something else. And I say to people, read the golden future book, read what's happening. The more you do that, the more you're focusing on, you are actually creating as you read it. And it will happen. It's going to happen inevitably. It's just the passage way to it. How easy that is.

JAN: And you did mention something about the intergalactic, I don't know, the species or something intergalactic that they had a discussion.

DIANA: So, the council, now that's the council that's in charge of the whole of this universe.

JAN: Right. I got very intrigued by that. Okay. So how does that work? Who are they and what role do they play on the connection with Earth? What is that?

DIANA: They're in charge of all the planets in this universe. And there are many great beings that we will all recognize on the intergalactic council, 12 members. Now, for the last two and a half or just nearly three years, I have monthly been putting on my YouTube a free meditation visualization, which takes you eventually to the intergalactic council to make a petition for humanity. And when we make a petition, then they take it or they don't take it.

But the more people that focus on it and want to create it, the more likely they are to take it. But these 12 beings, Aberdeen, Commander Ashtar, Quan Yin, I mean, some of the greatest of the masters now, it changed recently. But some of the greatest of the masters serve on the intergalactic council. And they're very much focused on helping Earth because of the venture that we're going on to climb two dimensions.

It's like climbing a very high mountain in this short 20 year period. And so it's been so much help from them and through them from the planets that they are connected to as well. I mean, for the first time in the last couple of years, since Pluto came in, we have been able to go into the stellar realms and literally download the light codes from them, bring them into our physical bodies, and then ask for activation when the time is right.

So the monadic merge meditation that I put free on YouTube every month has taken people from a lower frequency right up into higher

ascension.
And so every single person that's been doing it from the beginning, every single person is now in the sixth dimension. If they have done that regularly from the beginning, would we know what dimension we are in? In your third dimension, your heart is closed, you're self-serving, just working for what you want. In the fourth dimension, your heart has started to open and still you're starting to think about other people. In the fifth dimension, your heart is open and you're doing what is for the highest good. Now the sixth dimension is a step you don't have to take and go directly fifth to seventh. But the fifth dimension, sixth dimension is the journey through the angelic realms.
So it's where you connect with the angels and you also go through the stars. You connect to all the frequencies in the stars. So you become a universal being and then you move into the seventh dimension, which is the seventh heaven, and you are connecting at all times with the angels.
JAN: Interesting. I have to go back because I was curious about the Golden Age and this new era about the government structures. Will we have democracy? Will we have capitalism? Or will we discover new structures and models?
DIANA: Yes, the old models will not serve in a new higher frequency. Boundaries won't serve. Passports and visas, all that sort of thing. We are one. It's a big thing in the spirit in a plane at the moment, ringing through the energy of oneness, trying to touch us all with it. In fact, a couple of months ago, when I was meditating with a monadic merge, I saw in the cosmos this flame of oneness.
And angels, masters, and the higher selves of beings on Earth, all at their hands out like this, they were pointing towards the flame and adding their energy of oneness to it. And then I asked if I could bring that down over Earth. And I was told I could. I brought it down and I've been putting that out because, of course, if you know that you're one, you can't hurt anybody else because you're hurting yourself. And so it brings about peace and it brings about, well, just more than peace, a feeling of understanding empathy, knowing for all of humanity. And that's also what we're heading for as part of the new

age, part of a new Golden Age. And with that structure, you're not going to have one government in charge of a fast continent. You're going to have smaller units that are loving and welcoming to everybody else, all cooperating and sharing. It's a concept that we almost impossible to understand right now, because it's a consciousness shift. And that's what's happening as we move into higher frequencies of consciousness changes.

JAN: And I also heard you speak about that certain businesses won't be supported by the universe anymore. And soul conscious businesses will be supported.

DIANA: Right. So the old third dimensional paradigm was that if you worked hard and you focused, you did everything towards it, then your vision happened. You made it. That's not right now. What now happens is if you're working for the highest good, the universe will support those visions.

And so if you're working for the highest good of children, of animals, if you're being creative and expressing your creativity, those will be supported in the golden future. But as I've said, we won't be working in the way we're working now to earn a money to have a roof over our head. Everyone will have a roof over their heads, because it'll be a community that creates it. The moment we're very fractured, as soon as you've got a community that's loving everybody and inclusive, then everybody has a roof over the head because you build it all for each other.

JAN: Will this all happen because we will realize like we will really know that we're one and that separation will no longer exist in that sense because we have a knowing and thus we don't have that fear of not having enough, not belonging, because like I know I'm sitting here with you, I will know that we're one.

DIANA: Absolutely. We're all serving each other because we all want what's for the highest good. It's one of the things that my guide says so strongly, if you do something for your own highest good, the universe will rearrange itself so that it's for the highest good of everyone. So everyone is then acting for the highest good at all times.

JAN: And then community changes, governments change, but will fear evaporate then? Why do you need fear? Fear of death, for instance, fear of death, fear of losing our loved ones, fear of death?
DIANA: There's nothing, is it? You're just stepping from a physical body into a spiritual body. It's nothing. It literally is going through a door. Fear of losing loved ones. I think that's much harder for most people. And if you're not attached, then you let each other go.
And if you're surrounded with love and you know that one person, they've served what they needed to do on Earth, they've come and experienced and done their lessons and it's time for them to leave. They're just a doorway away. Don't forget we have gone through all the veils of amnesia. We've forgotten the veils of illusion and when in the higher, in the new consciousness, they will have been removed. So we won't have those for locking us from all knowing or seeing.
JAN: Do we have to believe this in order for it to happen or will it happen nevertheless?
DIANA: It's happening on Earth. It's part of the great shift that's taking place. As I say, it's just whether we make it easier or not. We can focus on it, we can resist it. But the energies are still moving forward towards love. I think away from fear, that's third dimensional. And the more you spend your time in, spiritual energies connected to nature, the more in peace and love you are. And then you don't want to hurt anyone else. How could you?
JAN: I have a dog and he's in the other room now and he really wants to join. But then he might start barking, so I don't dare to bring him in. But after I cut the wrong works, he wears any noise and he protects us. I think after I got my dog, I've been very fond of dogs and I wasn't before and I've become even more interested in animals and curious about them.
And when he looks me into his my eyes, he feels so divine. Like I'm just melting inside and I'm thinking, who are you? How much do you understand? And I know you're also passionate about animals. Yes, could you speak to that? You know, animals, what are they from a spiritual perspective? And where do they go when they die?
DIANA: Animals like humans are beings in a physical body come here to experience what's happening on Earth. And they're all doing

it in their own different ways. But the animals are right brain while we are left brain predominantly. And so they work from their instincts while we are thinking things through. But the deal on Earth was this is the contract that's signed between animals and humans is that we will treat them as equals because we are equal, but we will look after them when needed.
And, of course, we have not fulfilled our part of the contract in any way. And, of course, they've put up areas too. But as we love more and we become more one with everything, then, of course, animals will feel that and respond. I mean, I have can you see up here, I've got an orb of chamois, I don't know if you can see it. Yes.
And that's Archangel Chamois, the angel of love. And I often tell this story because I love that orb which I took in the garden many, many years ago, one night. And it's an angel of love in the middle, which is for white, then the pink energy is Archangel Chamois, angel of love. Round the very outside is Mary energy. And what I do is I just go into the woods, I close my eyes, and I just imagine that orb is round me and that I'm in that energy of love.
And something happens every time. But the time I like most was when I'm quite recently, and I was in the woods with my two dogs. And I was on the bridge looking over a stream, I closed my eyes, felt chamois, energy of love around me. When I opened my eyes, there was a bird on the railing right by me, though my two dogs are on one side of me and a fox sitting on the other side of me.
And then we got all encompassed in this love. I opened my eyes and moved and the bird threw away the dog's chest of the fox. But while I was held in love, everything, every creature felt safe enough to be together.
JAN: I think you mentioned, and I just continue talking that dogs know everything. Was that what I heard?
DIANA: I would say that my dog, especially these knows absolutely everything, everything I'm thinking, everything I'm doing. We are totally in tune.
JAN: So there are psychic beings and protecting us. And even more psychic, the cats will protect you.

DIANA: A cat's purpose, a domestic cat is that they protect the house of lower energies coming in. So they clear the lower energies and tigers and lions, the big cats, they are the protectors of the planet. And by 2012, their protection had lowered to 2%. But that's been climbing steadily ever since, which is another indication of how the frequency is changing on Earth.

JAN: Yes, I can really feel the unconditional love. And I'm just stunned by it from my dog, like how much he loves us. Always there, always smiling, always. It's touching. So we do have so much help.

DIANA: We are just surrounded by angels and helpers, amazing things. And we can send them to help other people. Many, many years ago, I went to Glastonbury for something, and I was staying in a bed and breakfast. And I didn't realize that the lady who owned the bed and breakfast was a medium.

And when I came back in the second morning, she said, you in blue, looking at me, I'm looking around, yes, you, you came in with a whole lot of angels yesterday, and you went out and you left them unemployed.

And I thought, my goodness, that was my first awareness. As soon as you work with angels, they see your light, they come to you. You're surrounded in angels. You can just leave them unemployed, or you can ask them to help people that are sick, to help ambulances, to go to countries where there's a problem, to help people anywhere, to help the animals, to help nature.

JAN: So what you're saying is that when, in order to receive help from angels, we have to give them a job. We have to ask.

DIANA: As soon as you ask, so much help is available.

JAN: Beautiful, beautiful. We have to wrap this up, Diana, but my final question that I ask everybody is what is self love to you, Diana? Oh, god, that is a big question, isn't it?

DIANA: Do you know, I suppose what it is, is doing what is for your highest good. So if I feel in tune with what's happening, and it's for my highest good, then I'm loving myself, honoring myself, and actually at the same time, honoring everybody else. And what is the deeper meaning of life from your perspective? Life is an experience.

It's a journey to get back to your divine self. So it's a journey into the source of all.

JAN: Beautiful. If people want to connect with you, you said you had a magic school, if they want to learn more about how to really open up to the Golden Era, how can they do so?

DIANA: My website is DianaCooper.com.

JAN: Wonderful. What is the last thing you want to leave with our audience today?

DIANA: Oh, just remember how loved you are. Just know it and trust it. And as soon as you know how loved you are, then everything in your life becomes bright and light and happy.

And also say something else, which is this, just open your arms to the world every morning and say, thank you for a wonderful day. And you're attracting beautiful energies to you for that day.

JAN: Well, I think everybody felt the high vibe today. And it was kind of cool how we marched, I think that's funny how that happens again and again. You wore your scarf. I was thinking, I should wear a scarf today.

And here you are. And you're wearing that, all the colors. Thank you so much for coming back to the show and for this wonderful inspirational hour and for all your beautiful work.

DIANA: Bless you. Thank you.
